

Recommended Configurations for MNIST

Configuration 1

- Optimizer: RMSProp
- Activation: ReLU
- Hidden Size: 128
- Learning Rate: 0.001

Reason:

Fast convergence and strong classification performance.

Configuration 2

- Optimizer: Momentum
- Activation: ReLU
- Hidden Size: 64
- Learning Rate: 0.001

Reason:

Stable training with lower computational cost.

Configuration 3

- Optimizer: SGD
- Activation: Tanh
- Hidden Size: 128
- Learning Rate: 0.0001

Reason:

More stable gradient updates and better generalization.
